EDUCATION

M.S. Learning Design and Technology | Stanford Graduate School of Education. **Sep 2024 – Sep 2025**

GPA: 3.9

- **Designed and tested an educational tool** that uses AI to help professors tailor their teaching strategies based on student backgrounds and ongoing formative feedback.
- **Developed multiple prototypes for testing and collected user feedback through qualitative and quantitative methods.**
- **I pitched my project for the Stanford Learning Design challenge.**
- **Presented final project findings and app Demo at Stanford's SWAYWO annual conference and LDT Expo.**

Honors thesis| Stanford Graduate School of Education **Sep 2023 – Jun 2024**

- **Led a thesis research project** evaluating Generative AI's effectiveness in personalizing scenario-based learning.
- **Designed and conducted UX testing** using mixed methods to assess personalized learning's impact on retention and motivation.
- **Built and tested** an **AI-driven learning prototype using AWS**, delivering tailored, scenario-based content.
- **Presented and published** research findings in the *Stanford Digital Repository*.

B.S in Symbolic Systems| Stanford University **Sep 2020 – Jun 2024**

GPA: 3.7

Relevant courses:

Data Analysis and Math:
- Questionnaire design
- Calculus
- Linear algebra, Multivariable Calculus and modern applications
- Introduction to data analysis and interpretation

Education and Psychology:
- Educational Neuroscience
- Entrepreneurship and innovation in Education Technology
- Engineering education and online learning
- Curriculum construction

Technology:
- Programming methodology (in Python)
- Programming abstractions (in C++)
- Applied Machine Learning
- AI in Healthcare

WORK EXPERIENCE

Lesson Developer | Stanford Classroom-Ready Resources AI for Teaching **Apr 2025 – Jun 2025**

- Developing brief, subject-specific **AI literacy lessons** for high school students.

Research Assistant | Stanford Educational Neuroscience Initiative lab **Jun 2022 – Jun 2025**

- **Developed an R package to streamline data analysis** and reduce redundant coding for PhD students, and **led automation of result scoring** using custom technological solutions to **improve research efficiency**.
- **Collected and analyzed behavioral and EEG data** across children, college students, and adults using Xdiva and conducted assessments and data collection sessions at **Synapse School classrooms**.
- **Designed and built SMARTE**, a math assessment tool for children, including **UI/UX design** (Figma, FlutterFlow, Canva), **front-end development, and conversion from PsychoPy to jsPsych**.
- Researched and implemented **AI-enhanced development workflows** using multi-agent systems (bolt.new, Lovable, Cursor) to support SMARTE's prototyping and deployment.

Curriculum Developer |TeachFX (Through Stanford Cardinal Course) **Jan 2025 – Mar 2025**

- **Designed a curriculum** to teach TeachFX's five high-leverage practices, aligning with **learning science principles** and company needs.
- **Created short, targeted lessons and activities** grounded in **curriculum design principles** for seamless in-app teacher learning.
- **Built a prototype** demonstrating how the curriculum integrates into the existing TeachFX platform.

Research Assistant | NANO FAB Lab San Diego State University **Summer 2021**

- Collaborated with graduate students to **research and test nanoelectrodes** used to measure brain activity
- **Certified with Lithography of level IIB** for the fabrication of the nanoelectrodes
- **Conducted independent research** to create models for how to use AI/ML in Brain-Computer-Interfaces
- **Led two research seminars** presenting my models and nanofabrication experience for *SDSU Women in Engineering and Black Empowered Learners.*

Skills: Python, C++, R, data analysis, statistical modeling, qualitative and quantitative research, survey design, user experience testing, UX/UI design, prototyping, curriculum design, LX design, team leadership, public speaking, organizing presentations, engaging with children, interdisciplinary collaboration, attention to detail, and problem-solving.
